

Introduction

This supplementary publication, denominated in United States dollars, has been prepared solely for the convenience of readers of the Annual Review. It does not form part of the full audited accounts of the Unilever Group.

The Annual Accounts of the Unilever Group are published by Unilever N.V. (NV) in Dutch guilders and Unilever PLC (PLC) in pounds sterling. The Annual Review is written on the basis of the results in guilders and sterling and may, therefore, not correspond with the performance in United States dollars. Changes in exchange rates can cause trends denominated in United States dollars to differ significantly from those in guilders or sterling.

The figures in this supplement are translated from an extract from the full accounts, which are prepared in accordance with accounting principles generally accepted in the Netherlands and the United Kingdom. These accounting principles differ in some respects from United States generally accepted accounting principles (US GAAP). The effect of these differences is shown on page 6 of this supplement. The annual report on Form 20-F which is filed each year with the Securities and Exchange Commission, in guilders and sterling, contains fuller disclosure of the differences.

The United States dollar amounts in this publication have been translated from guilders and sterling, as a matter of arithmetic computation only, at rates of exchange as follows:

	Annual average rates		Year	end rates
	1998	1997	1998	1997
US \$ 1 = Fl.	1.98	1.94	1.88	2.03

This supplement does not contain sufficient information to allow for a full understanding of the results of the Group and state of affairs of NV, PLC or the Group. For further information, the full Annual Review and Annual Accounts booklets should be consulted. See page 8 of this supplement for details of these publications.

Accounting policies

The accounts are prepared at current rates of exchange.

The accounts are prepared, in all material respects, in accordance with accounting principles generally accepted in the Netherlands and the United Kingdom.

The treatment of deferred taxation, for which full provision is made, complies with Dutch legislation as currently applied rather than with Accounting Standards in the United Kingdom.

NV and PLC shares held by employee share trusts and subsidiaries to satisfy options are deducted from capital and reserves as required by Dutch law whereas the United Kingdom Accounting Standard, UITF Abstract 13, would classify such shares as fixed assets.

Following the adoption of United Kingdom Financial Reporting Standard 14 'Earnings per share', dividends paid on own shares held internally to meet Employee Share Option plans have been excluded both from the results for the year and from dividends. 1997 figures have been restated on the same basis.

Euro Reporting

The Euro figures shown on pages 4 to 6 of this supplement have been derived from the Unilever Group consolidated results in guilders, using the official cross-rate of €1=Fl. 2.20371, produces an average rate of €1=£0.670 and a closing rate of €1=£0.706. This translation has been prepared solely for convenience of users and does not form part of the audited accounts of the Unilever Group.

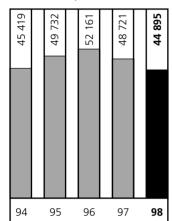

Special dividend

The Directors have announced a proposal to pay a special final dividend of 66.13p per existing ordinary share of Unilever PLC, and Fl. 14.50 per Fl. 1 ordinary share of Unilever N.V. and to consolidate ordinary share capital on the basis of 100 new ordinary shares for every 112 existing ordinary shares. In aggregate, subject to approval at the Annual Meetings of shareholders, approximately US \$ 8 billion will be returned to shareholders. The proposed special final dividend is equivalent to approximately 10.6% of Unilever's market capitalisation prior to announcement. Shareholder documentation including further information on the proposals will be sent to shareholders on 31 March 1999.

The following is a summary of the more important differences between Unilever's accounting principles and US GAAP.

Profit on sale of chemicals businesses

Unilever calculates profit on sale of businesses after writing back any goodwill previously charged directly to reserves. Under US GAAP the profit on disposal of the discontinued speciality chemicals businesses is stated net of the relevant unamortised goodwill included in the Balance Sheet and the cumulative currency retranslation differences recognised through the statement of total recognised gains and losses.

Goodwill and other intangibles

Prior to 1 January 1998 Unilever wrote off goodwill and all other intangible assets arising on the acquisition of new interests in group companies, joint ventures and associated companies directly to profit retained in the year of acquisition. Under US GAAP, goodwill and identifiable intangibles, principally trademarks, are capitalised and amortised against income over their estimated useful lives, not exceeding 40 years.

There is no difference between the accounting policy applied to goodwill and intangible assets purchased after 1 January 1998 and US GAAP.

Restructuring costs

Unilever charges all restructuring costs to the profit and loss account in the period in which the decision has been made to restructure a part of the Group's activities. Under US GAAP, certain types of restructuring costs are only recognised when further specific criteria are also met.

Interest

Unilever treats all interest costs as a charge to the profit and loss account in the current period. Under US GAAP interest incurred during the construction periods of tangible fixed assets is capitalised and depreciated over the life of the assets.

Pensions

Under Unilever's accounting policy the expected costs of providing retirement pensions are charged to the profit and loss account over the periods benefiting from the employees' services. Variations from expected cost are similarly spread. Under US GAAP, pension costs are also spread, but based on prescribed actuarial assumptions.

Dividends

The proposed final ordinary dividends are provided for in the Unilever accounts in the financial year in which they relate. Under US GAAP such dividends are not provided for until they become irrevocable.

Dividends for United States shareholders

The value of dividends received by shareholders in currencies other than guilders or sterling is affected by fluctuations in the rates of exchange.

For the holder of NV shares registered in New York, the normal final dividend payment and the special final dividend payment will both be determined by the rate of exchange ruling at the date of declaration, 4 May 1999. For the holder of PLC Depositary Receipts registered in New York, the figures will be determined by the rate of exchange ruling at the date of payment of the sterling dividend, 21 May 1999 for the normal final dividend and 9 June 1999 for the special final dividend.

For 1998, the actual interim dividends already paid in United States dollars, together with the proposed final dividends converted into United States dollars at the rate of exchange ruling on 22 February 1999 (US \$ 1 = Fl. 2.0048, £1 = US \$ 1.623) are as follows:

Per Fl. 1 of NV ordinary capital			p of PLC ry capital
